IBM Ink Printer

Flatbed Printing System for Tablets & Capsules

The IBM Ink Printing Machine is our high-speed, large scale production printing machine. With outputs over 300,000 pieces per hour, the IBM prints all tablets, soft gelatin capsules, and caplets with ease. This flatbed machine comes with a bulk hopper and flood feeder for maximum fill rates and can print one side of a tablet.

Features

- Single-sided printing
- Adjustable hopper for maximum fill rate
- Servo drive system for precision print registration
- Quick change carrier bar tooling
- Swingarm 15" touch screen HMI
- Wi-Fi connectivity
- Batch recording
- Data transfer capability
- 21 CFR Part 11 Compliant
- CE and UL certified

Capabilities

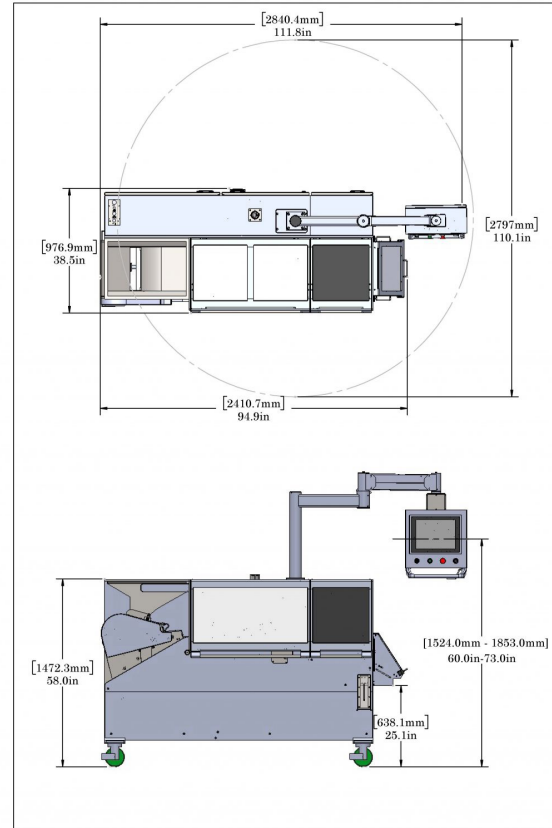

- Output Up to 300,000 / Hour
- Single Sided Marking with independent graphics
- Print alpha-numeric text, vector graphics, logos
- Graphics editing software provided
- Adjustable parameters to control logo size, line width
- Mark Bi-Color products with logo oriented on selected color side
- Orient logos based on product feature, such as tablet bisect line

Options

- Vision inspection system with single piece rejection
- Ink Viscosity System
- Rubber Roll Cleaning System
- Validation document packages available
- Floor level infeed bulk conveyor

Safety & Regulatory Compliance

- cGMP for Pharmaceuticals:
- FDA 21 CFR Compliance:
 - Part 210
 - Part 211
 - Part 11
- CE Compliant
- NFPA 79
- IEC / EN 60204-1
- ISO 13849-1
- CRC, c 870
- CDRH Compliant
